

MAGIC BUTTON

GSM – 2025 RECEIVER

The GSM-2025 works on the latest 4G technology. All you need is to insert a valid SIM card and program phone numbers of all the users through simple SMS text commands. When an authorised user makes a call to the receiver, it rejects the call after a single ring and activates a relay.

Since the call is rejected, the user is not charged for the call.

FEATURES

- ◆ Switches relay with free call from mobile phone.
- ◆ Built-in battery back-up
- ◆ Setup with easy to use PC software
- ◆ Only authorised numbers can operate the GSM-2025.
- ◆ No call charges.
- ◆ Operates from anywhere if GSM network is available. Unlimited range!
- ◆ Authorised numbers easily entered by SMS command.
- ◆ Digital inputs for sensor or switches.
- ◆ SMS confirmation of relay switching.
- ◆ Secure password protected.
- ◆ 12 Volts DC power pack included.
- ◆ Up to 999 users (maximum) available.
